F A N T A S T I C S

A Quarterly Industrial Ventilation Newsletter

Fourth Quarter 2021

Company News

- American Coolair now offers their JBC upblast roof ventilators with the motor out of the airstream. Sizes from 24″ ∅ through 60″ ∅ are available.
- Universal Fan & Blower manufactures a full range of heavy duty, industrial duty, fiberglass centrifugal & axial fans.
- Pure Air Filtration specializes in removing vapors, gases, and odors with proprietary filter media. Applications include printing processes, electronics, protection (ANSI/ISA/57104), welding, laser & plasma cutting operations, paper mill odors, wastewater treatment, sewage pumping stations, and more.

Project Spotlight

Industrial ventilation specialty projects continue to be plentiful. Projects in house are as follows:

- Gas turbine
- Power plant
- Marine engine room
- Shrimp farm aeration
- Freezer external condensation
- Aluminum dust collection
- Welding lab
- Power generator waste heat

Engineering Report

Aluminum dust can be very explosive, requiring special ventilation systems with safer guards.

The processing of aluminum fabrications requires the customer to utilize a test lab to determine the KST value prior to engineering systems that require handling aluminum dust.

At present we have several projects in house that are being worked on.
