

## SPECIALTY AND EXOTIC MATERIAL FANS AND BLOWERS

The growing awareness of air and noise pollution, as well as the increased sensitivity regarding environmental issues makes it important to tailor the design of industrial blowers and fans to each application. New materials, gasses and chemicals to be transported create the need for specialized air moving equipment. The addition of blowers to existing installations without careful analysis can create, rather than solve problems. We manufacture all types of standard and specialty industrial fans and blowers. The extraordinary is where IAP Inc. excels.

### Send Us Your Requirements

1. Volumetric Capacity (CFM)
2. Static pressure (in W.G.)
3. Application
4. Environment
5. Individual problems

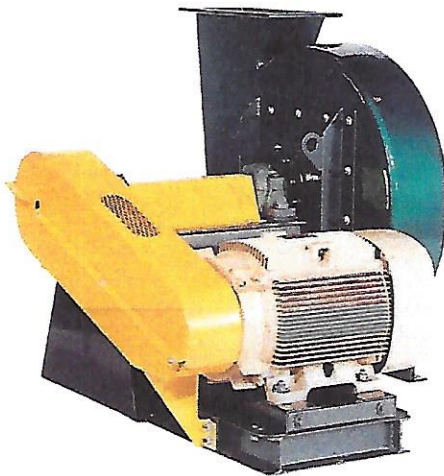

We'll Furnish a Recommendation.

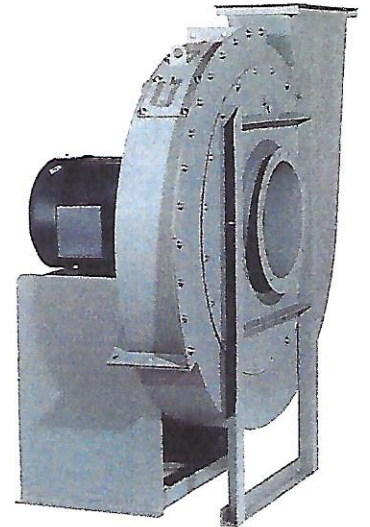

**PLUG FANS**

### A Few Typical Applications

- Recirculation in Furnaces and Ovens
- Exhausting of fumes and gases from processes
- Supply air for drying and heating systems
- Thermal Oxidation
- Pneumatic Conveying
- Scrubber Exhaust
- High Pressure Cooling
- Process Exhaust
- Fluidizing Processes
- Induced and Forced Draft Service
- Industrial Ventilation

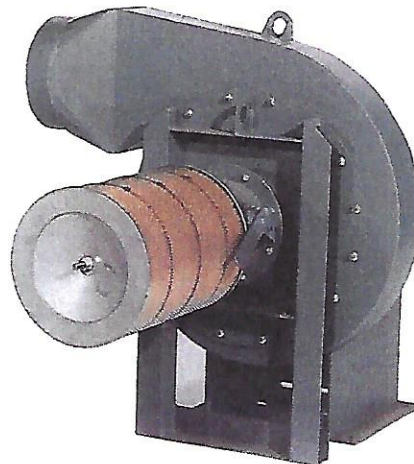

**FIBERGLASS**

**HIGH PRESSURE**

**DWDI VENTILATION**

**COMBUSTION AIR**

**AXIAL**
