

## Who is Nederman?

Nederman has been in business since 1944 and is the world's leading supplier of industrial air pollution control products and solutions. The US headquarters and manufacturing are in North Carolina, along with a production and stocking warehouse in Nevada and production and assembly plant in Canada. These facilities support the company's design, manufacturing, installation and service capabilities.

With the 2010 acquisition of Dantherm Filtration, and the 2012 acquisition of Environmental Filtration Technologies (EFT), Nederman expanded its extensive offering to include products, systems and services for dust, gas, smoke, mist and fume collections in dozens of industries including composites, recycling, vehicle exhaust, welding, and woodworking. Names like Mikropul and Pneumafil are staples in the industry. Other products include a range of self-retractable hose and cable reels, plus Nordfab clamp-together ducting. The company is ISO 9001:2008 and ISO 14001:2004 certified.

Nederman offers its products and solutions primarily through a nationwide network of dealers who are recognized experts in air pollution control and the processes utilized in the industries in which they compete.

The company's global headquarters is in Helsingborg, Sweden and Nederman operates manufacturing and assembly units in eight countries, sales offices in 29 countries and agents and distributors in over 30 countries.

For more than 60 years Nederman has developed, manufactured and marketed products and system solutions to reduce the strain on the environment and improve working conditions in numerous industries.

Our products and systems have been ground-breaking in industries such as machining, metal fabrication, automotive, composite manufacturing, food, paper, chemical, pharmaceutical and many others.

Today companies all over the world are using equipment from Nederman.
